

Healthcare communication boards keep your team organized and briefed and your patients and loved ones informed, no matter the Department in your facility. It's important the communication boards meet the exact needs of your Med staff and Unit. An optimal communication board is not one-size-fits-all. Customizations are the best approach to ensure seamless care.

THE 6 MOST IMPORTANT BOARD CUSTOMIZATION CONSIDERATIONS

BRAND AND DESIGN

Brand integrity is important in healthcare. Your inserts should be designed according to your brand, from logo to colors, value statement, and other style elements that are important to drive a visual consistency and message for your facility.

SIZE & SPACE LIMITATIONS

The wall space available will determine both the size of the board and how much space there is for printed information. Space restrictions might exist. That's why we create our communication boards in standard and custom sizes to accommodate your available space.

LEGIBILITY

From spacing to font style and size boards need to be legible and readable from a distance and at quick glance.

MULTI-LANGUAGE

Serving the demographic of your patients and staff in their native language for complete understanding of care is essential. Boards can be printed in multiple languages to suit your needs.

SOLUTIONS-BASED

Inserts should be customized based on the user group, like safety and prevention, huddle boards, behavioral boards, and patient care to ensure the nuances are addressed.

DEPARTMENT/UNIT-BASED

What information is most critital to your staff and your patients? The information captured your board will vary across Departments and Units.

The design and fabrication of our products are done in-house by our teams, better enabling us to create a board to your exact needs and specifications and meeting all custom criteria. The inserts are designed to meet a wide variety of specifications depending on the facility, Unit/Department, or team's needs.

Department, or team's needs.

Providing these customization options means you are not locked into formatting or information that isn't relevant to your facility.
